## Summary

Certified Full Stack Developer with a background in Quality Assurance. Proficient in HTML5, CSS, JavaScript, jQuery, Bootstrap, Express.js, React.js, databases, MongoDB, Node.js, MySQL, Git and more. A solutions-driven individual with a passion for web development and demonstrated expertise in all phases of the software development lifecycle (SDLC), including planning, design, deployment, maintenance, and experience working with Agile and Scrum methodologies. Recognized for attention to detail, critical thinking, and flexibility, and able to accomplish project milestones within specific timeframes. Completed a web development certificate program at the Berkeley Extension Bootcamp.

## Technical Skills

- HTML
- CSS
- Bootstrap
- Responsive Web-Design
- JavaScript
- jQuery
- Node.js
- Express
- React
- Handlebars
- MySQL
- Sequelize
- MongoDB
- Mongoose
- Java

## Projects

**Project:** LeadStack

**Description:** The purpose of this project is to create a lead source integration with Twilio to provide multiple channels of communication to potential customers.

**GitHub:** <https://github.com/isayahdurst/leadstack>

**Deployed Project:** <https://lead-stack.herokuapp.com/>

**Core responsibilities in project:**

- Designed wireframes to visually represent the project layout and functionality
- Established MongoDB collections and documents to efficiently store and retrieve data
- Configured GraphQL server and client side queries and mutations to enable seamless communication between the server and client
- Built React modules to enhance the User profile page and render Client cards on the Conversations page

**Technologies:** Node, Express, MongoDB, Mongoose, GraphQL, Bcrypt, JWT, React, Chakra UI

**Project:** Centiment

**Description:** MVP for a social media platform that displays trending topics and their popularity among users. Allow users to create new topics, make posts and comments for topics they invested in.

**GitHub:** <https://github.com/isayahdurst/centiment>

**Link to Deployed Project:** <https://centiment-inc.herokuapp.com>

**Core responsibilities in project:**

- Implemented middleware with proper authorization
- Developed User Profile page with Front-End and Back-End components, enabling users to upload avatars and store them in the database
- Created Explore page, integrating features to add new topics, search, and filter topics based on user preferences.

**Technologies:** Node, Express, Dotenv, MySQL, Sequelize, Bcrypt, JWT, Cookies, Handlebars, Bulma CSS, Multer

## Experience

### Software Test Automation Engineer

EPAM Systems Inc

2022-02 - 2022-07

Remote, CA

**Key Accomplishments:**

- Developed comprehensive end-to-end and API test plans, and created automation scripts for regression test cases to ensure safe deployment to staging for stakeholder testing.
- Automated UI and API testing using Selenium WebDriver with TestNG, Maven, Allure, and RestAssured with Gradle and EPAM report portal.
- Proactively reviewed daily test runs, identified and troubleshooted issues, reported application issues, and fixed automation scripts.
- Designed a robust framework for API testing using RestAssured, Gradle, and EPAM report portal to streamline testing processes and ensure consistent results.

**Technologies:** Git, Jenkins, Java, Selenium WebDriver, TestNG, RestAssured, Allure

### Key Tester

EPAM Systems Inc For Google

2021-10 - 2022-06

Sunnyvale, CA

**Key Accomplishments:**

- Conducted manual functional, automation, and exploratory testing to ensure product quality.
- Developed automation testing using BDD framework, Selenium WebDriver, and BeedooUI1.0 to streamline testing processes and reduce testing time.
- Designed and updated test cases, as well as the automation test framework, to ensure comprehensive testing coverage and minimize the risk of defects.
- Implemented a working test automation framework, updated test cases to cover all functionality, and incorporated 100% smoke tests and ACL API tests as part of the CI/CD process.

**Technologies:** FireBase DB, Selenium WebDriver, BeedooUI, Java

## Certificate

### UC Berkeley Extension Coding Boot Camp

Sept. 2022 - March 2023

A 24 week intensive program focused on gaining skills in the “Full Stack Developer Program”.
